GALLAXIA

WHITEPAPER
V1.0 - NOVEMBER 2025

GALLAXIA

The world's first gaming and entertainment studio powered by its own blockchain, co-owned by global gamers and creators.

FT. #1 faces of PUBGM, CODM & Fortnite Pros

DISCLAIMER

This White Paper has been prepared by Gallaxia to provide information about the $GLX token and its blockchain ecosystem. The purpose of this document is to present a comprehensive overview for potential buyers, participants, and stakeholders. However, this document does not constitute financial, legal, or tax advice and should not be interpreted as such.

LIMITATIONS
The information contained in this document is subject to change without prior notice, and while every effort has been made to ensure the data is accurate and reflects current conditions, Gallaxia do not guarantee the accuracy, reliability, or completeness of any information contained in this White Paper.

ASSOCIATED RISKS
Buying tokens and blockchain technology carries a high level of risk and may not be suitable for all participants. Before buying, participants are advised to seek independent and specialised advice.

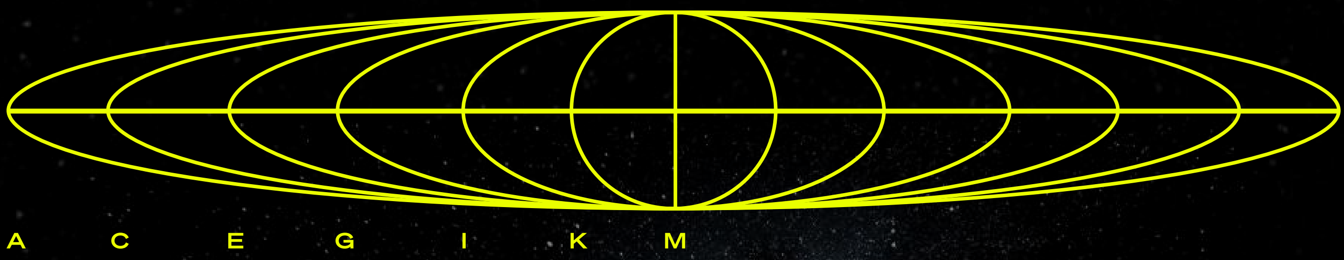
REGULATIONS AND LEGAL COMPLIANCE
This project is being developed to comply with applicable laws and regulations in the jurisdictions in which it operates. However, the rapidly changing nature of laws related to blockchain technology and digital tokens could present unforeseen risks.

REGULATIONS AND LEGAL COMPLIANCE

PUBLICATION DATE: NOVEMBER 2025
By accessing this White Paper, you agree to be bound by the terms and conditions set out in this disclaimer. Any breach of these conditions may result in legal action.

This document has not been reviewed by any regulatory authority and is not an informational brochure. Before investing in the assets described, consider all associated risks and seek professional advice. Investments can be high risk and could result in the total loss of the investment. Tokens will not be held in custody by authorised entities, and the blockchain technology used is new and could carry risks.

INDEX



EXECUTIVE SUMMARY

Gallaxia Chain is the world's first player and creator owned gaming and entertainment blockchain built for global reach, viral game experiences, and unique ownership structures.
Its innovative economic model channels revenue from games directly back to players, creators, and supporters through a tiered ownership system, redefining what it means to play, create, and invest in gaming.

The flagship title, Planet-X, is a mobile treasure-hunt shooter blending competitive gameplay with real-world prizes, high-stakes events, and a deeply integrated Web3 economy, designed to captivate both gamers and the mainstream audience.

GLOBAL DISTRIBUTION & STRATEGIC DIFFERENTIATION

What sets Gallaxia Chain apart is its unparalleled global reach, creator ownership, and brand participation, all embedded in the ecosystem from Day 1.

Our co-owners include some of the world's most recognized gaming creators, boasting a combined 200+ million followers across social platforms and directly connected to Gallaxia Chain through strategic NFT ownership. Among them are iconic figures such as Panda, Levinho, and Sevou, who form part of Gallaxia's founding community.

Collectively, co-owners content has generated over 30 billion views - a testament to their unmatched expertise and proven ability to grow loyal, global gaming audiences at scale.

This is not influencer marketing. This is influencer ownership. These creators don't just promote Gallaxia, they help build, govern, and grow it.

The result is a truly aligned ecosystem where players, creators and developers all share in the upside, making Gallaxia the first chain where the people who power the games also power the chain.

KEY UNIQUE SELLING POINTS

01

Unmatched Distribution By Global Creators

No other blockchain launches with this level of embedded reach and cultural presence. Gallaxia begins where others hope to end up. Our co-owners with 200M+ followers and 30B+ views on social media will activate directly within the Gallaxia ecosystem, driving:

- Branded events and in-game creator integrations
- Social campaigns tied to Planet-X hunts and NFT drops
- Onboarding and promotion of new games across Gallaxia

02

The On-Chain Gaming Studio

Gallaxia is a decentralized, token-powered alternative to traditional game studios. It enables global development, open collaboration, and community-powered publishing.

03

The Player-Owned Steam

Gallaxia is not just a chain, it's also a marketplace. The X-Armoury enables seamless trading, lootboxes, licensing, and game discovery, all governed by its participants.

04

A Global Flywheel Never Seen In Web3

Creator distribution drives gameplay. Gameplay drives rewards. Rewards drive staking. Staking drives governance and marketplace liquidity, creating a self-sustaining, global entertainment ecosystem.

05

Seamless Web2 To Web3 Onboarding

No wallets needed to start. GLX is introduced naturally through games on Gallaxia, digital asset trading, creator campaigns, and prize redemptions.

06

Growth Before Launch

Our co-owner network is expanding weekly, with every new partner revealed via the official @GallaxiaChain X page. By mainnet launch, Gallaxia expects to reach 400M+ followers in combined distribution power through its global co-owner network. Each co-owner brings unique reach and cultural influence, collaborating to cross-promote games and events across the Gallaxia ecosystem.

Gallaxia's structure delivers a flywheel of engagement, ownership, and scalability that no existing blockchain or traditional platform has achieved. It is a player-owned, globally distributed gaming chain, and it is redefining how game studios are built on-chain.

VISION & MISSION

The Vision

To become the world's largest gaming studio built on-chain, where the best games are built, the most loyal players are rewarded, and anyone can own a stake in the next gaming giant.

The Mission

To enable a transparent, community-powered gaming ecosystem by combining blockchain infrastructure with smart economic design, empowering studios, players, and creators alike

ARCHITECTURE

Gallaxia Chain is a blockchain launching with its own custom infrastructure.

EVM Compatible

Smart contract support for Web3 games, assets, and DeFi.

Ultra-Low Fees

Designed for microtransactions and high-frequency gaming.

Scalable

Supports thousands of concurrent player interactions.

On-Chain IP Ownership

Native NFT and asset support.

Governance-Ready

Decentralized decision-making via GLX token staking.

GAMES ON GALLAXIA CHAIN

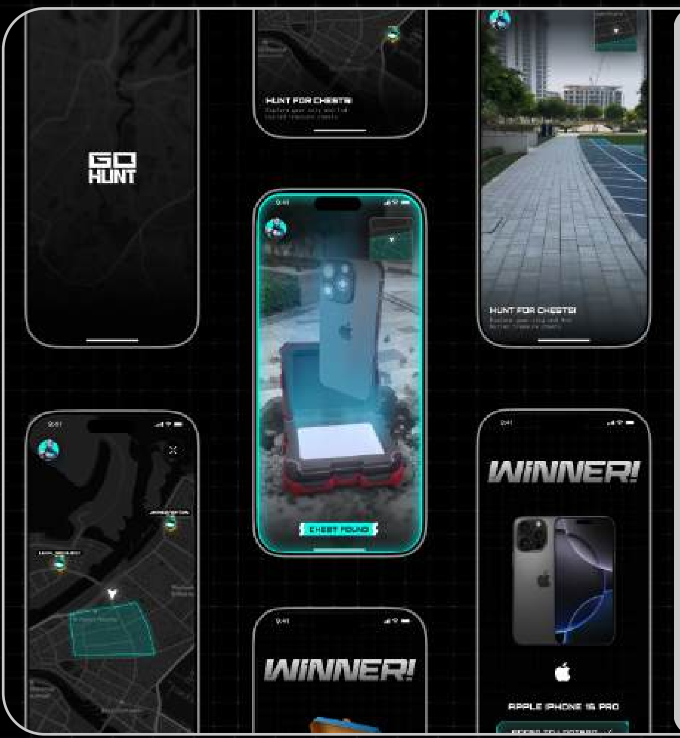
Gallaxia Chain will start with four core titles that showcase the platform's scalability, audience reach, and diverse gameplay experiences. Each title is integrated with the GLX token, the X-Armoury marketplace, and the Gallaxia ecosystem for seamless cross-promotion and reward distribution.

FLAGSHIP GAME

PLANET-X

Treasure hunt extraction shooter where players compete for real-world prizes on mobile. Free to play and designed for everyone, players battle to become the ultimate hunter and claim the top rewards.

- Our flagship mass-market IP is set to revolutionise mobile gaming
- The perfect marketing platform for brands to engage young audiences
- Available on iOS & Android



IN PRODUCTION

GO HUNT

Location-based mobile game turning cities into treasure-hunt arenas. Players race to find real-world prizes hidden in AR chests via their phone camera. Built for viral growth and live streaming, it seamlessly integrates brands into the action.

- An augmented reality treasure hunt that gets gamers off the couch and into the real world
- Explore your city, uncover hidden rewards, and take part in real-world adventures. All powered by the Planet-X universe
- The game will also feature activations and crossovers with brand partners from the Planet-X ecosystem.

FUTURE PRODUCTION

ONE PIXEL

Using the core treasure-hunt game loop, One Pixel is a lighthearted hyper-casual hunt where every tap could lead to a real-world prize. Perfect for those who prefer calm, accessible play over intense shooters, it delivers quick sessions that fit any schedule.

- OnePixel is built for those who love exploration, strategy, and discovery, without the pressure of competition or violence
- Expect cross-pollination from brand partners and the wider Planet-X
- Available on iOS & Android

FUTURE PRODUCTION

PLANET-X CONSOLE

A AAA FPS for console and PC that delivers a fully immersive, lore-rich Planet-X universe. Combining Halo-style environments with the core Planet-X treasure-hunt game loop, it creates a competitive experience unlike anything else in gaming.

- The ultimate evolution of our vision
- Once we've conquered mobile, we're bringing our flagship IP to the big screen, with all the core mechanics players love, supercharged by the full power of console gaming
- This is Planet-X like you've never seen it before: bigger, bolder, and built to redefine the genre

OUR PRODUCTS

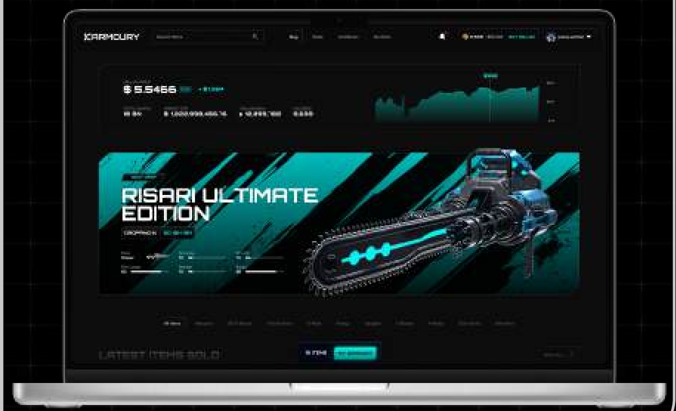
We have a suite of products designed to grow the Gallaxia ecosystem, each fully integrated with our native token $GLX.

LIVE

X-ARMOURY MARKETPLACE

The X-Armoury is our exclusive marketplace, where all in-game assets from titles launched on Gallaxia can be traded using $GLX.

Inspired by CSGO’s trading ecosystem, our model removes barriers for both players and collectors.



FUTURE PRODUCTION

HUNTER LEAGUE

The Hunter League is an exclusive Gallaxia product where fans earn rewards from Planet-X hunts.

Fans can buy shares in their favorite players and receive Gallax rewards when those players win. Leaderboard victories unlock exclusive prizes for both players and fans.

As hunters win, their shares grow in value, while players earn whenever their shares are traded , creating a direct fan-creator connection with real-time shared rewards.

OWNERSHIP & ECOSYSTEM REWARDS

Gallaxia redefines what on-chain ownership means through Gallaxium Bars; digital assets that make our community truly a part of every game and product we launch.

It also earns on-chain rewards from trading, in-game sales, and more, distributed in real time, with full transparency to every Bar holder

A Gallaxium Bar is a digital asset representing tokenised ownership across all Gallaxia games and products, connecting holders to the value of everything built on the chain.

750 SUPPLY

GALLAXIUM BAR

$10,000
FULL OWNERSHIP

$500, $1K, $2.5K OR $5K
SHARED OWNERSHIP

To claim a Gallaxium Bar, you'll need to purchase $GLX during our upcoming pre-sale. Once you have $GLX, you can use it to claim a full Gallaxium Bar or part ownership of one.

Receive (split between each bar)

- ✦ 5% ownership benefits are allocated across every game launched on Gallaxia Chain (full details and legal structure at gallaxiumbars.com)
- ✦ 30% of all trading fees generated on the X-Armoury marketplace are allocated to holder rewards pool
- ✦ 10% of network gas fees from chain activity are allocated to the holder reward pool
- ✦ 5% of gem pack sales on X-Armoury are allocated to holder reward pool
- ✦ 5% of lootbox sales on X-Armoury are allocated to the holder reward pool
- ✦ 1% of all trading fees within the Hunter League are allocated to holder reward pool
- ✦ 1.5% of total token supply is reserved for an exclusive staking pool with monthly distributions to Bar holders as rewards
- ✦ 2% GLX promotional airdrop reserved for Gallaxium Bar holders

Ownership benefits are defined exclusively by the Gallaxium Bars Terms under Panamanian law (see gallaxiumbars.com). These benefits are only available under that framework and do not constitute equity or securities in Gallaxia chain or its affiliates outside of Panama, and are not available in jurisdictions where such offerings are restricted.

All distributions are executed in GLX and governed by smart contracts, reflecting usage-based rewards generated from protocol activity. Gallaxium Bars function as ownership nodes within the Gallaxia ecosystem. An ownership node is a premium staking and rewards-sharing position in Gallaxia. It is not a blockchain validator node and carries no infrastructure maintenance responsibilities

GALLAXIUM BAR OWNERSHIP TERMS

All transfers must occur via www.GallaxiumBars.com.

Full Ownership Terms

Staking Requirements

- Must stake US$10,000 worth of GLX tokens.
- $GLX unlocks progressively at key FDV milestones - a performance-based system aligned with Gallaxia's growth, over a period of up to two years.
- All participation subject to KYC and compliance approval by Gallax.

Early Exit (Before 24 Months)

Participants may exit early under the following terms:

- 20% break penalty on the original staked tokens.
- Transfer permitted only if:
  - Buyer stakes the same amount of $GLX tokens originally staked.
  - Buyer begins a new 24-month lock-up.
  - Buyer completes KYC and compliance checks.

At 24-Month Maturity

Participants have two options:

A. Retain Gallaxium Bar (Re-stake Required)

- Re-stake 30% of your final $GLX milestone unlock at current market price.
- Begin a new 24-month lock-up.
- Remaining 70% unlocks linearly over 4 months.
- No fees or penalties.
- Unlocked tokens may be used to meet the re-stake requirement.

B. Sell Gallaxium Bar

- New buyer must stake US$10,000 worth of $GLX and accept a new 24-month lock-up.
- Sale must occur via the official Gallaxia platform.
- 5% royalty applies, paid to the platform.
- Seller's original tokens unlock over 4 months; no forfeiture or penalty.
- Sale subject to company approval and buyer KYC.

For the full terms and conditions please see www.gallaxiumbars.com

Shared Ownership Terms

Staking Requirements

- Contribution levels: US$500, US$1,000, US$2,500, or US$5,000 worth of GLX tokens.
- $GLX unlocks progressively at key FDV milestones - a performance-based system aligned with Gallaxia's growth, over a period of up to two years.
- Contributions are pooled into a vault administered by Gallaxia.
- Each Pooled Gallaxium Bar is subject to a 24-month lock-up.
- Participants earn a pro-rata share of all Gallaxium Bar benefits based on their contribution.

Maximum Participation

- Participants may join multiple pools, subject to availability and compliance approval.
- All participation subject to KYC and compliance checks.

Restrictions

- No early cash withdrawal without replacement.
- No off-platform transfers; all replacements and transfers must occur via www.GallaxiumBars.com.

Replacement on Early Exit

If a participant wishes to leave before maturity:

- Gallax will source a replacement from the official waitlist; or
- The exiting participant may provide their own replacement, subject to approval.

Replacement Terms

- Replacement must stake the same amount as the original.
- A new 24-month lock-up applies to the replacement.
- KYC and compliance checks required.
- Written approval from Gallax is mandatory.
- Until replacement is complete, the exiting participant remains bound by the original lock-up.

Benefit Distribution

- All royalties, rewards, and other benefits are distributed in real time in proportion to stake percentage.
- Example: If a US$10,000 Gallaxium Bar earns US$1,000 in royalties in one month:
- US$1,000 contributor → 10% = US$100
- US$2,500 contributor → 25% = US$250
- US$5,000 contributor → 50% = US$500
- Any equity rights are distributed when received

At 24-Month Maturity

Participants have two options:

A. Re-Stake & Continue

- Re-stake 30% of your final $GLX milestone unlock at current market price.
- Begin a new 24-month lock-up.
- Remaining 70% unlocks linearly over 4 months.
- Benefits continue uninterrupted
- Unlocked tokens may be used to meet the re-stake requirement.

B. Exit & Withdraw

- Receive originally staked tokens.
- Tokens unlock linearly over 4 months.
- Benefits end upon exit.

PERFORMANCE BASED $GLX UNLOCKS

Gallaxia's tokenomics align the community with the network's growth through staking $GLX to obtain a Gallaxium Bar.

The $GLX token features a performance-based unlock system designed to evolve alongside the ecosystem's success.

Instead of traditional time-based vesting, tokens unlock progressively at key Fully Diluted Valuation (FDV) milestones (based on a 30 day TWAP) over a period of up to two years, ensuring long-term alignment between the team, creators, and community.

As the ecosystem expands and reaches new growth milestones, unlocks are automatically activated on-chain for full transparency.

Example Scenario of Unlocks of a $10,000 $GLX Purchase at Drop 1

FDV	Percentage released when hit	Released token value ($USD)	Vesting (Days)
$250m	5%	$2,614	7
£500m	10%	$10,455	14
£750m	10%	$15,682	21
$1bn	10%	$20,909	21
$1.5bn	20%	$62,727	30
$2bn	25%	$104,545	30
24 months final unlock	20%	N/A	120

Illustrative and educational only. Based on 2-year unlock and proportional FDV growth. Not financial advice or a guarantee of any returns. $GLX Tokens issued by Gallax Token Ltd (BVI); Gallaxium Bar benefits handled separately under Panama law.

Fallback Unlock Provision

If the Gallaxia ecosystem does not reach the initial FDV milestone of $250 million within six (6) months of the Token Generation Event ("TGE"), a time-based fallback unlock will automatically begin.

Under this mechanism, up to 100% of each participant's locked $GLX unlocks linearly from month seven (7) through month twenty-four (24) following TGE, or until the next FDV milestone is achieved , whichever occurs first.

OPTIONAL RE-STAKE

Upon each milestone-based token release, Participants may elect to re-stake any portion of their unlocked $GLX for an additional twenty-four (24) month period ("Re-Stake Term").

Re-staking is voluntary and must be elected through the Company's on-chain portal within fourteen (14) days following each milestone confirmation.

Failure to elect within this window shall be deemed a waiver of re-stake rights for that milestone.

Re-staked tokens will unlock linearly over twenty-four (24) months from the date of election.

Participants who re-stake shall receive bonus allocations from the Gallaxia Re-Stake Reserve according to the level of commitment:

100% Re-stake

A re-stake of 100% of your unlocked tokens

Reward: 30% bonus $GLX

50% Re-stake

A re-stake of 50% of your unlocked tokens

Reward: 15% bonus $GLX

25% Re-stake

A re-stake of 25% of your unlocked tokens

Reward: 10% bonus $GLX

Bonus allocations vest proportionally with the re-staked principal.

This system ensures that re-staking is voluntary, time-bound, and fully on-chain verifiable, rewarding participants who commit to long-term alignment with the Gallaxia ecosystem.

TOKENOMICS

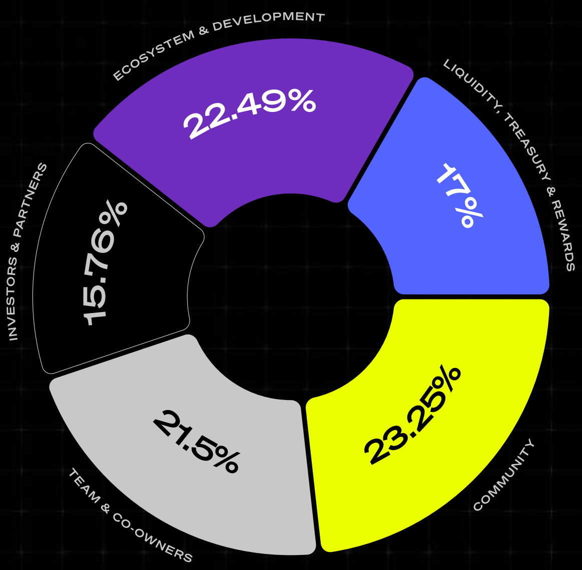
Community	23.25%
Gallaxium Bar Holders & Community	16.25%
Airdrops	7%

Team & Co-owners	21.5%
Chain Contributors (Present & Future, 48m vesting, 4m cliff)	15%
Co-owner Creator Allocation (24/36m vesting, 1m cliff)	6.5%

Investors & Strategic Partners	15.76%
Seed Investors (12m vesting, 4m cliff)	5.76%
Launch Partners Allocation (TBA)	10%

Ecosystem & Development	22.49%
Operations & Infrastructure (48m vesting)	16.49%
Marketing (24m vesting)	5%
Prize Pools (24m vesting)	1%

Liquidity, Treasury & Rewards	17%
Liquidity	7%
Treasury	3%
Performance Milestone Unlocks (24m vesting)	7%



STAKING & DAO GOVERNANCE

Holders can stake GLX to unlock:

- Voting rights in Gallaxia DAO
- Exclusive hunt access and creator perks
- In-game discounts and upgraded lootbox odds
- Monthly GLX staking rewards

Voting power is tiered by:

- Amount staked
- Duration
- Reputation Score (based on gameplay, content, and community contribution)

GLX TOKEN UTILITY

The Gallax Token ($GLX) is the native asset of the Gallaxia Chain and serves as the foundation of the ecosystem. It powers all economic, social, and community-driven activities across games, applications, and creator initiatives. $GLX is not just a medium of exchange, it is the bridge that connects players, creators, and co-owners, ensuring alignment and shared success across the chain.

Core Ecosystem Functions

Buy, Sell, & Trade (X-Armoury Marketplace)

$GLX is the primary currency for the X-Armoury marketplace (www.x-armoury.com), where players can buy, sell, and trade assets across every game launched on Gallaxia. This marketplace acts as the economic backbone of the chain, a unified hub where all digital assets are liquid and tradable. Imagine the scale of CS:GO's marketplace economy, but seamlessly integrated and secured on-chain.

Unlock Lootboxes

Players use $GLX to unlock exclusive lootboxes that may contain the rarest in-game items across Gallaxia titles, starting with Planet-X. Lootboxes are already a multi-billion-dollar economy in gaming (with players spending millions weekly in titles like CS:GO); Gallaxia brings this model on-chain with transparency and community alignment.

Player Incentives & Rewards

In-Game Rewards for User Retention

$GLX powers the incentive layer across Gallaxia games, rewarding players for completing challenges, achieving milestones, and maintaining consistent engagement. For example, in Planet-X, completing ten hunts in a row, topping leaderboards, or winning special events can all generate $GLX rewards. This system fosters long-term retention and creates a play-to-earn dynamic rooted in skill and achievement rather than speculation.

Shop Discounts

Holders of staked $GLX receive discounts on in-game purchases across all Gallaxia titles. Different staking periods will unlock different discounts. This creates a direct incentive for players to hold and spend $GLX, while simultaneously driving demand for the token. Discounts ensure that loyal community members benefit from meaningful savings across the ecosystem.

Community & Access Layer

Access to Exclusive Gallax Events

$GLX doubles as a key to exclusive experiences. Token holders can access Gallax-only hunts in Planet-X, special in-game challenges, or even real-world live events streamed globally. These exclusive activations deepen community engagement and create unique value that extends beyond traditional gameplay.

Creator Hub

The Creator Hub is Gallaxia's viral growth engine, designed to empower creators of all sizes. Once accepted as affiliates, community members gain access to a platform that rewards them in $GLX for producing content around Gallaxia games. This system allows Gallaxia to automatically scale an army of content creators worldwide, giving small and medium-sized creators the tools and incentives to grow while amplifying the reach of the ecosystem.

The Vision

Through these utilities, $GLX becomes more than a token, it is the economic foundation and unifying force of the Gallaxia Chain. Every trade, reward, and piece of content created strengthens the ecosystem, aligning players, creators, and co-owners around shared upside.
The result is a self-reinforcing model where gameplay, ownership, and community growth feed into one another, creating a sustainable and scalable on-chain gaming economy.

AIRDROPS

To further align long-term commitment with value creation, Gallaxia has established a dedicated airdrop framework. Because Gallaxium Bars require long-term $GALLAX lock-ups, a portion of airdrops has been specifically allocated to these holders. This structure ensures that those most committed to the ecosystem benefit as the chain grows.

Airdrop Eligibility Includes:

- Gallaxium Bar holders

In addition, dedicated airdrops will also extend to:

- Staked X-Droid holders from Planet-X
- XP holders from Gallaxia Chain activities

Airdrops will be unlocked at key Gallaxia milestones, ensuring that rewards are distributed as the ecosystem scales. This design guarantees that only dedicated community members share in the upside of Gallaxia's long-term success.

TREASURY

The Gallaxia Treasury serves as a cornerstone of the network's long-term sustainability and operational efficiency. Its central purpose is to collect protocol fees and ecosystem revenues denominated in $GLX as well as other stable or partner assets such as USDT or DAI. These aggregated funds are strategically deployed to deliver daily supplemental rewards across the ecosystem ensuring a consistent flow of incentives for players, creators, and holders even after the initial community rewards pool has been fully distributed.

To enhance capital efficiency and preserve ecosystem balance, the treasury employs a multi-tiered allocation framework. A defined share of daily rewards is distributed to stakers, liquidity providers, and game-based reward pools, while another portion is directed toward ecosystem reintegration mechanisms. These reinvestment loops both sustain active participation and contribute to long-term token equilibrium by subtly managing circulating supply dynamics.

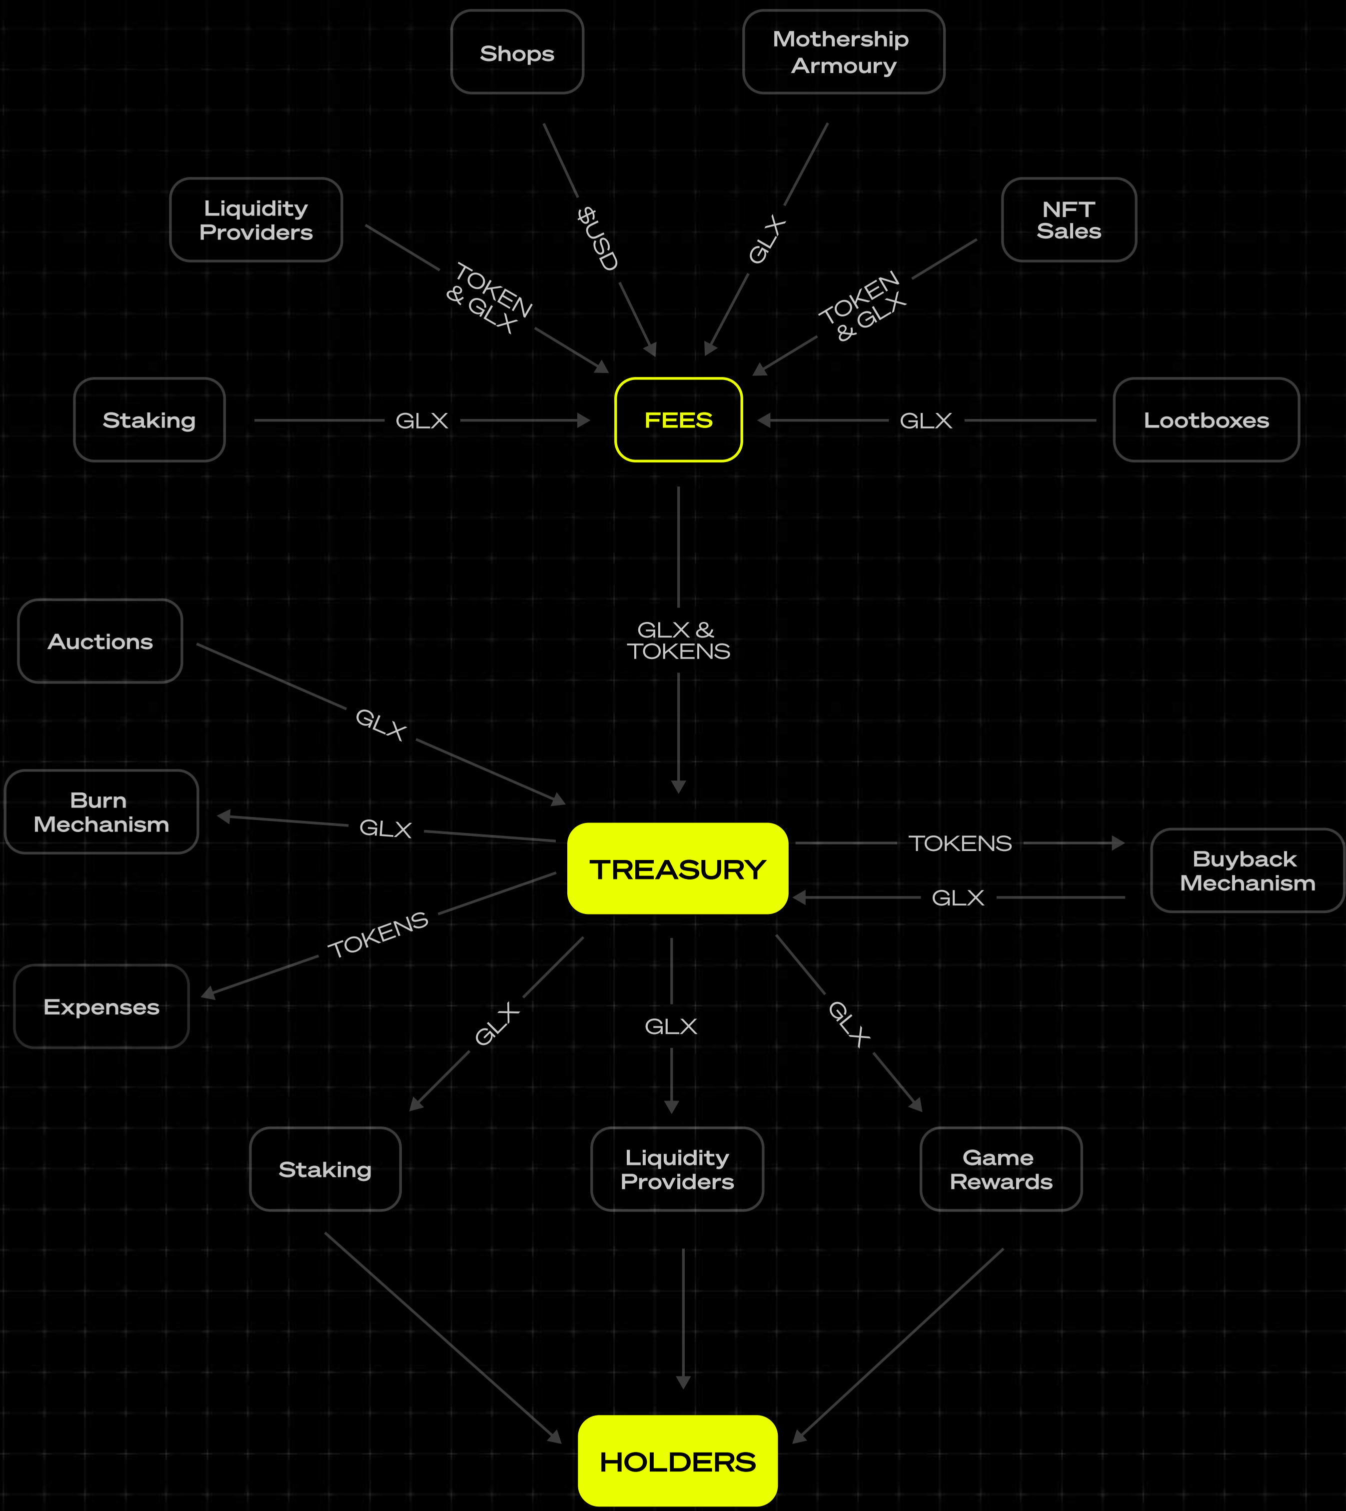
By maintaining reserves in diversified assets, the treasury can effectively cover operational and development expenditures without creating downward pressure on the $GLX token. This approach safeguards token stability and provides liquidity buffers during periods of increased ecosystem spending or expansion.

In the long-term horizon, the Community Rewards Pool - a primary source of user incentives, is projected to deplete after approximately seven years. Upon reaching this stage, the treasury will assume responsibility for maintaining equivalent annual reward distributions. A proportional reallocation of funds from treasury reserves will ensure continuity of incentives without centralizing token control. This design prevents accumulation within the treasury that could otherwise reduce community participation and influence, maintaining Gallaxia's decentralized and player-owned foundation.

TREASURY FLOW DIAGRAM

Games and products built on the Gallaxia Chain have the inherent capability to generate revenue directly for the ecosystem treasury. This ensures that value flows into the treasury from multiple, diversified sources - including in-game transactions, marketplace activity, NFT royalties, and partner integrations.

By allowing every product and game within the Gallaxia ecosystem to contribute a portion of its fees back to the treasury, the network establishes a self-reinforcing economic loop that continuously funds rewards, development, and long-term sustainability across all layers of the ecosystem.



TREASURY & ECOSYSTEM REINTEGRATION MECHANISM

The Treasury & Ecosystem Reintegration Mechanism within the Gallaxia Chain is a foundational component designed to enhance the long-term utility, sustainability, and cyclical value flow of the $GLX token across the ecosystem. A portion of revenue generated from both on-chain and off-chain activities, denominated in assets such as USDT, ETH, or other stable-value token, , may be strategically allocated for open-market acquisition of $GLX.

These acquired tokens are then reintegrated into the ecosystem treasury and redistributed through several key channels, primarily:

- Replenishing the Community Rewards Pool, ensuring ongoing support for player incentives, staking rewards, and ecosystem participation.
- Funding ecosystem initiatives, including creator rewards, development grants, strategic partnerships, and broader programs that expand Gallaxia's decentralized, player-owned economy.

Additionally, up to 25% of net revenue generated from the Gallaxia Web2 Layer, including marketplace transactions, merchandise sales, promotional integrations, and brand collaborations, may be directed to the ecosystem treasury.

This mechanism strengthens the token economy by maintaining a sustainable liquidity buffer for future community rewards, operational needs, and long-term ecosystem expansion.

By cyclically reintegrating $GLX into the ecosystem treasury through governance-approved allocations and ecosystem grant frameworks, this mechanism ensures that token utility remains active, transparent, and purpose-driven. It mitigates unnecessary ecosystem volatility while reinforcing Gallaxia's commitment to a self-sustaining, participant-driven economic structure.

This reintegration process is discretionary, adaptive, and subject to ongoing governance oversight. It is not intended as a price-management or investor-return mechanism, but rather as a means to reinforce the functional health, engagement incentives, and long-term sustainability of the Gallaxia ecosystem.

EMISSIONS & INFLATION FRAMEWORK

Gallaxia's emissions and inflation framework is built around principles of controlled sustainability and equitable participation. The network follows a 9.6% annual emission schedule, proportional to the circulating supply. This model ensures a predictable, steady release of $GLX into the ecosystem, providing sufficient liquidity for ongoing rewards, governance, and development, without compromising token stability.

The emission model is designed to reward activity over passivity. Newly issued $GLX tokens are allocated exclusively to users who actively contribute to the network through staking, gameplay, governance participation, content creation, or other measurable ecosystem engagements.

Rewards are distributed proportionate to verified activity, transaction frequency, and meaningful contribution to the ecosystem's value creation. Holders who remain inactive or do not engage in on-chain or community-based participation will not be eligible for these emissions.

This design cultivates a dynamic and meritocratic ecosystem, ensuring that $GLX distribution directly supports those who help grow and sustain Gallaxia. The result is a balanced, long-term token economy that continuously aligns user incentives with the ecosystem's overall growth and resilience.

ECOSYSTEM ACTIVITY - BASED TOKEN REDISTRIBUTION

To maintain alignment between $GLX token supply and ecosystem activity, the Gallaxia DAO, comprised of community and governance participants, may propose and implement an activity-based token redistribution mechanism. This system dynamically adjusts token allocations in response to real-time engagement metrics, such as Daily Active Users (DAU) and network participation rates.

Under this framework, periods of heightened ecosystem activity result in a greater proportion of $GLX being distributed to active participants, ensuring that rewards scale alongside community engagement. Conversely, during lower activity periods, unallocated or excess tokens are redirected to the Gallaxia Treasury, where they are reserved for future ecosystem growth, partnerships, and reward initiatives.

This adaptive model reinforces a sustainable token economy by directly linking distribution to verified engagement. It fosters a self-balancing economic cycle that rewards growth, promotes retention, and preserves long-term equilibrium within the Gallaxia ecosystem.

VAULT GOVERNANCE & LONG-TERM TOKEN SUSTAINABILITY

To strengthen long-term sustainability and transparency, a portion of the $GLX token supply may be locked within a decentralized “Gallaxia Vault.” The duration and terms of this lock-up period are determined by DAO governance, ensuring that the process remains transparent and community-controlled.

Upon the conclusion of the lock-up period, the use and allocation of these vault-held tokens will be governed through proposal-based voting within the DAO. Community members may propose and vote on initiatives determining how these tokens are redeployed, including:

- Replenishing ecosystem reward pools to sustain long-term participation,
- Funding development efforts for games, infrastructure, and tools, and
- Supporting strategic alliances and partnerships that expand Gallaxia’s reach and adoption.

This vault mechanism ensures that every major allocation of $GLX remains accountable, transparent, and mission-aligned, empowering the community to shape the ecosystem’s future while preserving its decentralized and player-owned foundation.

ROADMAP

2025

- ✦ Gallaxium Bar sale 1
- ✦ Planet-X mobile closed beta
- ✦ Gallaxia Reveal

2026

- ✦ Gallaxia Testnet & Mainnet
- ✦ Planet-X global launch
- ✦ Go Hunt beta and launch
- ✦ One Pixel Beta and launch

2027+

- ✦ Planet-X Console/PC Beta
- ✦ Indie Game Fund
