

GALLAXIA

LOGOMARK

The Gallaxia logo is comprised of the Gallaxia Orb, supported by the wordmark.

The Gallaxia Orb is made up of an oblong ellipse shape with a star cut from the

The ellipse illustrates the shape of a galaxy with the central star representing stars within a galaxy. A galaxy metaphor is used to symbolise Gallaxia chain because of the potential galactic scale of the layer 1 blockchain but also the stars as nodes within the chain.

LOGO LOCKUPS

Three lockups of the Gallaxia logo may be used: full (vertical), full (horizontal) and icon only.

The vertical lockup is to be used as the primary lockup and especially when horizontal space is limited.

The horizontal lockup is to be used when vertical space is limited.

The icon only lockup is to be used when both vertical and horizontal space is limited and when the logo size is smaller than the minimum size of the full lockup.

CLEAR SPACE

For the logo to have optimal visibility and maximum impact, it needs room to breathe.

For each variation of the logo we must give it at least one orb height's distance on all sides from any other content on the screen or page.

PRIMARY PALETTE

Gallaxia uses three primary colours to represent the brand.

Blazing Lime - #EBFF00

Black - #000000

Grey - #C8C8C8

These should be used in 99% of use cases for the brand. In some scenarios we need more colours, these are documented on the next page.
